Journal of Voice
Volume 7, 1993

Subject Index

Accent method, voice therapy, 319
Acoustics, perceptual-acoustic relationships, spasmodic dysphonia, 165
  voice research, 293
Acoustic analysis, vocal tract, 97
Acoustic measurement, vocal tract, 97
Actor's speech, subglottal presssure variation for, 227
Adjective checklist, voice therapy, 354
Aerodynamic impedance, airflow measurements, theory, 38
Aerodynamics, voice research, 293
Aging, phonational profiles, female professional singers and nonsingers, 219
Air flow
  accentuations of FO, SPL and, accent method of voice therapy, 319
  inverse-filtered, EGG measures and, sustained vowels and syllables, 47
  mean, changes, vocal fold length and, canine, 311
  measurements, theory, 38
Air pressure, airflow measurements, theory, 38
Airway, restoration of, sarcoidosis of the larynx, 81
Amplitude smoothing, fundamental frequency and, shimmer calculation, 235
Australian fiberscopic profile, revised, 377

Belting
  pharynx, source, formant, and pressure characteristics, 301
  pop and, approaches to female middle voice, 142
Book reviews
  Professional Voice: The Science and Art of Clinical Care, 95
  Visual Representation of Speech Signals, 390
Botulinum toxin, perceptual-acoustic relationships, spasmodic dysphonia, 165

Choir, unison sounds, voice scatter in, 129
Choral intonation, unison choir sounds, 129
Choral timbre, unison choir sounds, 129
Chorus, unison sounds, voice scatter in, 129
Clinician/client interaction, voice therapy, 354
Complex partial seizures, vagal nerve stimulation, laryngeal function and, 359
Consistent behavior, voice therapy, 354

Dysphonia, see also specific type
  pushing exercise program, 250
  sulcus vocalis, slicing mucosa surgical technique, 365
  tracking change in, 179

Electroglottograph, inverse-filtered air flow and, sustained vowels and syllables, 47
Electromyography
  laryngeal, vocalization-related, macaque monkeys, 54
  sustained vibrato, supralaryngeal muscle activity during, 213
Ensemble, unison choir sounds, voice scatter in, 129
Epileptogenic foci, vagal nerve stimulation, effects on laryngeal function, 359
Extent of frequency vibrato, synthesized vowels, 151

Female voice
  premenstrual syndrome effects, 337
  professional singers and nonsingers, phonational profiles in, 219
Fiberscopic laryngoscopy
  Australian, 377
  flexible, normal larynges characteristics, 382
Fiberscopic profile assessment protocol, Australian fiberscopic profile, 377
Flageolet register, physical definition of, 206
Flow glottogram, phonatory control in male singing, 15
Force vectors, during laryngoscopy, vocal fold exposure in phonosurgery, 189
Formant dispersion
  flageolet register, 206
  unison choir sounds, 129
Formant frequencies, comparisons, operatic and musical theatre singing, 301
Formant tuning, overtone singing, 118
F_0 range, superimposition of speaking voice characteristics and, 30
F_0-SPL profile, sources of variation in, 1
Functional dysphonia, manual laryngeal musculoskeletal tension reduction technique, 242, phonetograms in, 136
Functional electrical stimulation (FES), laryngeal function and, 359
Fundamental frequency
  flageolet register, 206
  inverse-filtered air flow and EEG measures, sustained vowels and syllables, 47
  local smooth window size and, shimmer calculation, 235
  phonatory control in male singing, 15
  speaking, female professional singers and nonsingers, 219
  tracking change, dysphonia, 179

Gender effects, vocal perturbations, 326
Glottal closure
  incompetence, pushing exercise program, 250

Glottis
permittance, phonatory control in male singing, 15

Habitual pitch, speaking, female professional singers and nonsingers, 219
Histology, voice research, 293

Inverse filtering, comparisons, operatic and musical theatre singing, 301

Jitter, tracking change, dysphonia, 179

Laryngeal function, vagal nerve stimulation and, 359
Laryngeal musculoskeletal tension, manual reduction technique, treatment for functional voice disorders, 242
Laryngeal nerve, recurrent resection, adductor spasmodic dysphonia, 172
Laryngeal paralysis, pushing exercise program, 250
Laryngoscope, triangle, vocal fold exposure in phonosurgery, 189
Laryngoscopy
head and neck position in, vocal fold exposure in phonosurgery, 189
suspension, vocal fold exposure in phonosurgery, 189
Larynx
activity. during vocalization, macaque monkeys, 54
biomechanics, 123
inverse-filtered air flow and EEG measures, sustained vowels and syllables, 47
minor alterations, slicing mucosa surgical technique, 365
normal, flexible fiberscopic and stroboscopic examination, 382
premenstrual syndrome effects, 337
sarcoidosis, 81
Linguistic experimental phonetics, historical perspective, 257
Long-term results, recurrent resection of laryngeal nerve, adductor spasmodic dysphonia, 172

Magnetic resonance imaging, sarcoidosis of the larynx, 81
Manual laryngeal musculoskeletal tension reduction, technique, treatment for functional voice disorders, 242
Matching, vocal, frequency modulation in synthesized vowels, 151
Microendoscopic surgery, sarcoidosis of the larynx, 81
Middle voice, female, belting and pop approaches to, 142
Mode of phonation, male singing, 15
Monkey, laryngeal and respiratory activity, during vocalization, 54
Mucosal upheaval, vocal fold vibration, canine, 311
Mucosal wave movement, overview, 123
Music performance, stage speech and, subglottal pressure variation for, 227

Neurolaryngology, voice research, 293
Nodules, dysphonia, tracking change in, 179

Overtone enhancement, productive mechanisms and acoustics, 118

Perception, perceptual-acoustic relationships, spasmodic dysphonia, 165
Perturbation, vocal, 326
Pharynx, shape, operatic and musical theatre singing comparison, 301
Phonation, larynx biomechanics, 123
Phonational range, speaking, female professional singers and nonsingers, 219
Phonatory models, voice research, 293
Phonetics, linguistic experimental, historical perspective, 257
Phonetogram
functional dysphonia, 136
sources of variation in, 1
superimposition of speaking voice characteristics and, 30
Phonosurgery
sulcus covalis, slicing mucosa surgical technique, 365
vocal fold exposure in, 189
Pitch scatter, unison choir sounds, 129
Pneumotachography, airflow measurements, theory, 38
Pop singing, belting and, approaches to female middle voice, 142
Premenstrual syndrome (PMS), effects on voice, 337
Psychosocial factors, young voice users, intervention with, 160
Puberty, young voice users, intervention with, 160
Pulmonary function flow-volume loops, sarcoidosis of the larynx, 81
Pushing exercises, glottal incompetence, 250

Rate of frequency vibrato, synthesized vowels, 151
Regeneration, recurrent resection of laryngeal nerve, adductor spasmodic dysphonia, 172
Register
definition, flageolet, 206
female middle voice, belting and pop approaches to, 142
Respiratory air flow, measurements, theory, 38
Respiratory muscles, activity, during vocalization, macaque monkeys, 54
Russian vowels, qualitative and quantitative respects, 270

Sampling stability, vocal perturbation measures, 326
Sarcoidosis, larynx, 81
Shimmer, calculation, local smoothing window size and fundamental frequency effects, 235
Singers
female professional, phonational profile, 219
untrained and trained vocal groups. phonetograms, 30
voice students, vocal attrition in, 69
Singing
operatic, comparisons with musical theatre, 301
pop, approaches to female middle voice, 142
subglottal presssure variation for, 227
sustained vibrato, supralaryngeal muscle activity during, 213
unison, voice scatter in, 129
Singing voice, overtone, 118
Smith accent method, voice therapy, 319

Soprano voice
  flageolet register, 206
  sustained vibrato, supralaryngeal muscle activity during, 213
Spasmodic dysphonia
  perceptual-acoustic relationships in, 165
  recurrent laryngeal nerve resection, long-term results, 172
Spinal cord, sarcoidosis of the larynx, 81
Steroid therapy, sarcoidosis of the larynx, 81
Subglottal pressure
  comparisons, operatic and musical theatre singing, 301
  inverse-filtered air flow and EEG measures, sustained vowels and syllables, 47
  phonatory control in male singing, 15
  short-term variation, singing and stage speech, 227
Sulcus vocalis
  glottal incompetence, pushing exercise program, 250
  slicing mucosa surgical technique, 365
Supralaryngeal muscles, activity, sustained vibrato, 213
Symptomatology, premenstrual syndrome, female voice and, 337

Tetany, vagal nerve stimulation, effects on laryngeal function, 359
Theory
  air flow measurements, 38
  vocal tract acoustics, 97
Time-shift effects, vocal perturbations, 326
Tracheostomy, sarcoidosis of the larynx, 81
Training, voice, 195
Trial effects, vocal perturbations, 326

Unison singing, voice scatter in, 129

Vagal nerve, stimulation effects, laryngeal function, 359
Vibrato, sustained, supralaryngeal muscle activity during, 213
Vibratory characteristics, voice research, 293
Videoendoscopy, yawn-sigh, voice therapy technique, 75
Videolaryngoscopy, sarcoidosis of the larynx, 81
Videostroboscopy, normal larynges characteristics, 382
Vocal attrition, voice students, 69
Vocal folds
  changes in length, mean air flow rate and, canine, 311
  exposure, phonosurgery, 189
  inverse-filtered air flow and EEG measures, sustained vowels and syllables, 47
  normal, flexible fiberscopic and stroboscopic examination, 382
  vibration, canine, infraglottic aspect of, 311
Vocal function, research, 293
Vocal hyperfunction, yawn-sigh, voice therapy technique, 75
Vocal intensity
  phonational profiles, female professional singers and nonsingers, 219
  superimposition of speaking voice characteristics and phonetograms, 30
Vocalization, laryngeal and respiratory activity during, macaque monkeys, 54
Vocal loudness
  phonatory control in male singing, 15
Vocal pedagogy, belting and pop approaches to female middle voice, 142
Vocal range, sources of variation in phonetograms, 1
Vocal reeducation, young voice users, intervention with, 160
Vocal rehabilitation, slicing mucosa surgical technique, 365
Vocal tract acoustics, 97
Vocal vibrato, synthesized vowels, 151
Voice
  female, see Female voice
  historical perspective, 257
  larynx biomechanics, 123
  normal, flexible fiberscopic and stroboscopic examination, 382
  perceptual-acoustic relationships, spasmodic dysphonia, 165
  talent or training, 195
Voice disorders
  functional, manual laryngeal musculoskeletal tension reduction technique, 242
  students, vocal attrition in, 69
Voice parameters, accent method of voice therapy, 319
Voice profile, pitch and amplitude, sources of variation in phonetograms, 1
Voice quality, overtone singing, 118
Voice research
  terminology, errata, 291
  voice production, 293
Voice source, phonatory control in male singing, 15
Voice therapy
  accent method, 319
  consistency in, 354
  pushing exercise program, glottal incompetence, 250
  yawn-sigh technique, 75
Vowel timbre, unison choir sounds, 129

Yawn-sigh, voice therapy technique, 75
